

## Canine Surgery Electives

Patient/Client: \_\_\_\_\_

Chart #: \_\_\_\_\_

Below are lists of elective services that are recommended for the best care of your dog.

**Please initial if you would or would not like these additional services done with your pet's surgery today.**

### Home Again Microchip:

This is a form of permanent identification using a tiny microchip. It contains a unique identification number that aids in recovery of a lost/found pet. The microchip is inserted prior to surgery using a hypodermic needle.

Pinewoods Animal Hospital pays for your registration and first year of service.

### Therapeutic Laser Treatment:

Therapeutic laser treatment is a non-invasive, drug free solution for animal pain and healing. It uses light to stimulate cells and increase blood circulation. At the correct laser wavelength, pain signals are reduced, and nerve sensitivity decreases by releasing endorphins or natural painkillers.

### Heartworm, Flea and Tick Prevention:

Heartworm, Flea and Tick prevention is recommended year-round for all dogs. We offer a variety of products in hospital and through our online pharmacy. Please let us know if you need your dog's next dose.

- **Simparica Trio** – Once a month oral tablet for Heartworm, roundworm, hookworm, flea and tick prevention
- **Milbeguard** – Once a month oral tablet for Heartworm, roundworm, hookworm and whipworm prevention
- **Heartgard** – Once a month oral tablet for Heartworm, roundworm and hookworm prevention
- **Simparica** – Once a month oral tablet for flea and tick prevention
- **Seresto** – Eight-month collar for flea and tick prevention
- **Vectra 3D** – Once a month topical flea and tick prevention

If your pet has fleas in the hospital at the time of surgery, we will require a flea treatment to be applied or administered. **There is a charge for this medication.**

Please send me with preventatives - YES NO Type/Amount: \_\_\_\_\_

We send all surgical patients home with an Elizabethan collar. If you already have one, please bring it to the surgical appointment so that we can make sure it is the right fit for your dog.
